• GitHub: <https://github.com/ndorado3>

Enthusiast full stack web developer and UX designer with a background in Industrial Design. My interest in web development and UX design grows from my fascination with human judgment, decision-making process and problem solving. My military career has taught me to be persistent and solve problems in creative ways.

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript

**Applications:** GitHub, MySQL

**Graphic:** Photoshop, Illustrator, InDesign, XD, Axure

**Tools:** Bootstrap, Node.js

## PROJECTS

**The Hookahp** | <https://the-hookahp.herokuapp.com/> | 2021

- This application is an online storefront, with user login credentials, for a custom hookah-making company, Wilbo, where a visitor to the website can customize their hookah out of their favorite bottle of liquor.
- Group project responsibilities: Wireframe, styling of the site, routes and handlebars for the hookah's page.
- Tools / languages used: HTML, CSS, JavaScript, Handlebars, Bootstrap, Node.js, Adobe Xd.

**The Omega (Pet) Project** | [https://savannahf.github.io/The\\_Omega\\_Projet/](https://savannahf.github.io/The_Omega_Projet/) | 2021

- The user can search for adoptable dogs around their area by inputting their zip code. The results page displays all available dogs for adoption with an image and information about the dog.
- Group project responsibilities: Wireframe, and styling the site.
- Tools / languages used: HTML, CSS, JavaScript, JQuery, Bootstrap, Google fonts, Illustrator.
